Hi Alex,

We've been working with Meghan and others on a response to this email which came in to you week before last. The response was controlled.

Our recommendation is to make this a Direct Response, from Meghan Cassidy to Ms. Hodge, so that you are not perpetually asked directly to weigh in on this. I wanted to check if you agree with our approach or if you prefer to have the response come directly from you in this instance.

Thanks! Let me know if you'd like to discuss this.

Dave

Doug, as we discussed this should be tracked and managed as controlled correspondence. mra

Good afternoon, I am bringing to your attention this report because there are now unprecedented levels for Merrimack in regards to PFAS contamination. Specifically on page 6 of 17, You will see a 19,000PPT reading. Also we now are showing GEN X in our water.

If Saint Gobain has supposedly stopped using this contaminant for approximately 2-3 years, why is it showing up in numbers this high? These numbers have only increased.

Is it time for the state of NH to do something to stop these numbers? We have been asking NHDES for something to be done and AGAIN nothing is being done.

I thank you as always in advance for your time.

Katharine Hodge
